How do I see evaluation results as a student?

Currently registered students are able to see results for course sections in which 70% or more of the enrolled students completed the evaluation, and for the seven student course evaluation items. The rest of the items and responses are used for administrative purposes, including faculty promotion and tenure. As such, they are not shared publicly because they are part of an instructor's personnel file.

Summer 2014 to Present

Results for course evaluations completed in our current system are available through ELMS. This currently includes results for Fall 2016 and Spring 2017; additional semesters will be added during the Fall 2017 semester.

2. Click the CourseEval icon from the sidebar on the left side of the screen.
3. Click the "View Evaluation Results - Students" link from the menu. If you do not see this link, it is because we have not identified you yet as a registered student.
4. Search by course number (enter all or part, no spaces, e.g. ENGL or ENGL101), course title, or instructor name (all or part of last name) in the top panel.
5. Then click on a row to see evaluation details in the bottom panel.

You also can watch this video to see the student results tool in action:

Fall 2007 to Spring 2014

Results for course evaluations completed in our previous system are available through separate web-based reports.

1. Access CourseEvalUM at https://CourseEvalUM.umd.edu
2. Click the "View Results in Legacy System" button, and enter your Directory ID and password.
3. Search by course (enter all or part, no spaces, e.g. ENGL or ENGL101) or instructor name (all or part of last name). Or browse by semester, college/department, course prefix, and course.
